

The National Association of Church Design Builders (NACDB) was established to create a nationwide practical application of biblical values resulting in their excellence as specialists in consulting, designing and building church facilities that focus on the ministry needs and styles of the churches they serve.

In short, we exist to educate local churches in evaluating their needs regarding buying, building, expanding, remodeling or leasing facilities that promote their ministry's mission, vision and values. Accordingly, our web site is designed to provide useful information for your church to accomplish these tasks.

NACDB members are successful regional consulting / design-build firms. They join together to create a "best practices" template so as to sharpen one another's skills for the benefit of the churches they serve. We are honored to serve you.

CO-SPONSORED BY:

Fuqua Construction, Inc., has been in business since 1979 and has been working on behalf of churches to plan, design and build worship facilities that enhance and live out the mission statement of each individual congregation that we form a construction relationship with.

Our past experience has built a growing list of customers who have entrusted us with this responsibility. Included in our services to churches is attendance at committee meetings, practical advice in the early planning stages, pre-construction drawings, 3D renderings, virtual tours, fly-by presentations, a smooth running construction project and a quality turn-key facility.
